## Project

### Bookmark Maker

[project1\\_link](#)

**Technologies used :** HTML, CSS, JS, Bootstrap

A user-friendly tool for saving, organizing, and accessing favorite websites quickly.

- Bookmarks displayed in a sleek UI using HTML, CSS, and Bootstrap.
- Easy addition of bookmarks through JavaScript DOM operations and Form inputs.
- One-click access to saved websites from the UI.

### Blog List

[project2\\_link](#)

**Technologies used :** React JS, REST API Calls, CSS, Bootstrap

Designed a streamlined blog list platform.

- Displayed blog information with React components and lists.
- Ensured optimal viewing on all devices through Bootstrap and CSS.

### Wikipedia Search Application

[project3\\_link](#)

**Technologies used :** HTML, CSS, JS, REST API Calls, Bootstrap

A custom wikipedia search application that provides a simplified and intuitive way for users to access and view relevant information. With the ability to easily search for and view curated results, users can dive deeper into their interests with just a click.

- Streamlined search results with HTML list elements, styled for a modern and user-friendly interface using CSS, Bootstrap and responsive design.
- Effortlessly access information with asynchronous fetch GET HTTP API calls and the option to open the desired result in a new tab for further exploration.
